                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Forest Park Parkway, Box 8501, St. Louis, MO 63108, USA
                                                                                                                                                                        nitrogen. Stratagene's cDNA Synthesis Kit (cattalog number 200401) was used to synthesize the cDNA. First-strand synthesis was performed with 5-methyl dCTP, hence the ligated cDNA was hemimethylated. A modification of Stratagene's first-strand synthesis primer was used. An 'anchor' nuclectide (V=A, C, or G) was added to the 3' end of the primer (GAGAGAGAGAGAGAGAGAGAGAGAGAGAGAGAGAGAGTTCTCGAG(T)18V) to anchor the primer at the 5' end of the poly(A) tract. After second-strand synthesis, the CDNA ends were filled in with cloned Pfu DNA, ligated to EcoRI adapters and subsequently phosphorylated. The CDNA was then precipitated and redissolved in sterile, RNase-, DNase-free water. The XhoI site within the first- strand synthesis primer was then restricted by digestion with XhoI from Promega (40U/u1); all XhoI sites in the CDNA would be protected by their hemimethylated status. The cDNA constructs were size-fractionated with a 500bb cutoff, using Sephacryl S-500 High Resolution (Pharmacia Biotech) in a 2-mm diameter column and a bed volume of approximately lml. The column eluent was precipitated, redissolved, and ligated into Stratagene's pBluescript IX R Predigested vector (pBluescript II SK(+) vector that has been digested with BcoRI and XhoI, and phosphorylated by Stratagene). This library was constucted in the laboratory of Dr. Paul Keim and Dr. Virginia H. Coryell at Northern Arizona University."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     /note="Vector: pBluescript II SK+; Site_1: EcoRI; Site_2: XhoI, The mRNA was isolated from roots of 8 day old 'Bragg' supernodulating mutant NTS382 seedlings that were infected with Bradyhizobium japonicum, strain USDA 110, 72 hours prior to harvest. Dr. Gary Stacey generously donated the tissue. The roots were flash-frozen in liquid
